The safe, clean, and convenient way to compost all your food scraps. Bokashi is Japanese for "fermented organic matter." Bokashi composting is a safe, quick, and convenient way to compost in your kitchen, garage, or apartment, using a specific group of microorganisms to anaerobically ferment all food waste (including meat and dairy). Since the process takes place in a closed system, insects and smell are controlled, making it ideal for urban or business settings. The process is very fast, with compost usually ready to be integrated into your soil or garden in around two weeks. While bokashi has enjoyed great popularity in many parts of the world, it is still relatively unknown in North America. From scraps to soil, Bokashi Composting is the complete, step-by-step, do-it-yourself guide to this amazing process, with comprehensive information covering: Background-the history, development and scientific basis of the technique Getting started-composting with commercially available products or homemade systems Making your own-system plans and bokashi bran recipes using common materials and locally sourced ingredients Growing-improving your soil with fermented compost and bokashi juice. This essential guide is a must-read for gardeners, homeowners, apartment dwellers, traditional composters, and anyone who wants a safe, simple, and convenient way to keep kitchen waste out of the landfill.

How to set up and maintain a worm composting system.

Seit der weltweiten Finanzkrise gelten Investitionen in Ackerflächen als besonders krisensicher. Waren es früher Staaten, die Länder kolonisierten, sind es heute Energie-, Rohstoff- oder Finanzkonzerne. Sie kaufen und pachten großflächig Land in Afrika, Asien, Osteuropa und Südamerika, was weltweit zu massiven Preiserhöhungen bei Nahrungsmitteln führt. Die Folge sind Hungersnöte, Aufstände in immer mehr Ländern, die zu einem Verlust der politischen Stabilität und zum Kollaps der Welternährung führen. Dieses Buch zeigt erstmals, wer die Akteure dieses Bodenrausches sind und wer seine Opfer. Und was jeder einzelne in seinem Konsum- und Essverhalten tun kann, um ihn zu stoppen. Denn wer Biosprit und volle Supermärkte aus industrieller Landwirtschaft braucht oder sein Geld in Agrar- und Boden-Fonds investiert, unterstützt die globale Jagd nach den Äckern der Welt.
