First published in 1995. Routledge is an imprint of Taylor & Francis, an informa company.

This book provides a highly accessible overview of public education policy. It organizes knowledge about 21st century education policy around two main topics: the policy process, and the discourse on public education policy. This unique organization provides a novel lens for better understanding the dynamics and contents of current education policy making. The work also offers a broad overview of theories of public policy, economics, demography, sociology, history, and psychology. Each chapter includes a discussion of data derived from the international and Israeli contexts. The book provides a series of valuable insights relevant to researchers, practitioners, and policymakers interested in understanding the multifaceted aspects that shape contemporary education policy.

This book highlights the current ideas about the what, why and how of educational change and what these suggest about the essential issues that change policy makers and planners need to consider. It analyses international case studies of change initiatives to illustrate how the change process can be affected when such issues are insufficiently acknowledged or ignored. Finally the book introduces a number of key questions for educational change practitioners to consider when they find themselves responsible for the planning and/or implementation and/or monitoring of changes within an institution, a locality or a region. Educational change scenarios, from change within a single institution to local implementation of a national change, are used to show how answers to these questions can help change planners to closely match their implementation processes to their local contextual realities.

"Keys to understanding the various types of demographic data and the essential techniques needed by those who desire to apply such data to the management of education systems."--Publisher's description.

I: ICT in Education, some major concepts and a short historical overview II: Curriculum III: Infrastructure IV: Staff development V: Organizational change and leadership VI: National educational policy and implementation strategies in ICT VII: Looking into the future.
