Jannik Götz develops a treatment concept for sufferers of Seasonal Affective Disorder, commonly known as winter depression. Unlike existing solutions that focus on medical remission only, the author aims at creating a user experience that is alleviating symptoms of this disease in a motivating and hassle-free way. By utilizing a variety of research techniques, the author gains valuable user-driven insights that are directly transformed into a novel approach to light therapy. The result is a light lamp that resolves shortcomings and issues of current treatment approaches. A business plan and its associated requirements complement the overall concept.

The advent of mobility-as-a-service and the disruption of the automotive industry are both overlapping and fuelled by the same developments and thus raise a very fundamental question: are we at peak car?

Based on the author's extensive field research, academic study, and professional experience, this book explores this very question as well as the underlying social, economic, generational, and regulatory changes that lead to a new mobility regime. Through rich descriptions of established OEMs and mobility start-ups, it discusses the current forms of mobility and the promise of autonomous technology. It further explores the strategic dimension of these developments so as to navigate and succeed within the disruptive and ever-changing environment of mobility services.

This book examines business model transformation through the study of electrical utilities, an industry at the center of today's efforts to combat climate change. When change comes to the business model of such a mature industry, the pattern is often recognizable. The foundational elements of the industry shift, allowing the innovation of business models by new competitors, while established firms face the threat of disruption. The utility sector, after decades of relative stability, is in the midst of such a transformation today. After providing a historical summary of the dominant business models of the utility sector, Transformation of the Electric Utility Business Model looks at the factors currently impacting the industry. Utilities and policy makers today are facing two long-term issues that will dominate their agendas in the coming decades: rebuilding utility infrastructure to enable the decarbonization of the economy, and managing the risk of catastrophic events that can leave large areas without power for extended periods. Fortunately, with proper planning, many utility investments in decarbonization will also support risk management. However, these investments are often not compatible with current utility business models, requiring creativity and new regulatory frameworks to successfully implement. This book considers the impact of these factors, and then discusses the future. This well-researched, extremely insightful book is essential reading for all those with an interest in business strategy, energy studies and sustainability.

In an ever more digitized world, it necessary to embed digital technology in business strategy, leading to an overarching phenomenon called the digital business strategy. Accordingly, this thesis sets out to advance the understanding, the digital business strategy concept in general as well as its influence on a company's performance. At the same time, incumbents are often constrained by path dependencies and inertia as executives tend to make use of prior experiences and favor strategic choices they are familiar with over unfamiliar As a consequence, companies may stick to a specific path which restrains transformational change. Accordingly, the study elucidates the ongoing digital transformation as it manifests itself in the evolution of incumbents' digital business strategies. In addition, this thesis seeks to derive important implications for business practice, as it helps practitioners to develop a better understanding of digital business strategies, especially considering that digitalization

challenges the conventional wisdom of competition. This is particularly important, as with increasing digitalization, tightly integrated digital business strategies will be among the biggest determinants of a company's future success. In einer immer stärker digitalisierten Welt ist es wichtig digitale Technologien in die Geschäftsstrategie eines Unternehmens einzubetten, was zu einem übergreifenden Phänomen führt, das als digitale Geschäftsstrategie bezeichnet wird. Dementsprechend zielt diese Arbeit darauf ab, das Verständnis des Konzepts der digitalen Geschäftsstrategie im Allgemeinen sowie dessen Einfluss auf die Performance eines Unternehmens zu verbessern. Gleichzeitig sind etablierte Unternehmen oft durch Pfadabhängigkeiten und Trägheit eingeschränkt, da Führungskräfte dazu neigen, auf frühere Erfahrungen zurückzugreifen und strategische Entscheidungen, mit denen sie vertraut sind, gegenüber unbekanntem Optionen zu bevorzugen. In der Folge verharren Unternehmen auf einem bestimmten strategischen Pfad, was transformatorischen Wandel hemmt. Dementsprechend beleuchtet die Studie die laufende digitale Transformation und wie diese sich in der Entwicklung der digitalen Geschäftsstrategien etablierter Unternehmen manifestiert. Darüber hinaus versucht diese Arbeit, wichtige Implikationen für die Unternehmenspraxis abzuleiten, da sie Praktikern hilft, ein besseres Verständnis für digitale Geschäftsstrategien zu entwickeln, insbesondere in Anbetracht der Tatsache, dass die Digitalisierung die konventionelle Weisheit des Wettbewerbs herausfordert. Dies ist besonders wichtig, da mit zunehmender Digitalisierung eng integrierte digitale Geschäftsstrategien zu den größten Determinanten für den zukünftigen Erfolg eines Unternehmens gehören werden.

There has been growing interest on business models among academics and practitioners in recent years, as business model describes how an organization creates, distributes and captures value and, therefore, can be considered the DNA of the organization. Recently, factors related to digital transformation, the vital role of sustainability and social aspects, along with an increasing globalization, have pushed towards radical transformations in business models. This book aims to further our knowledge on business model innovation in new contexts of analysis and with new perspectives of investigation. Insights from business model innovation are presented from studies focusing on start-ups, small businesses and large businesses to provide a bigger picture on new dynamics connected to digital transformation, sustainability, new global relationships. As such, the scope is on new ways to create value, new components and dynamics (such as digitalization and sustainability) concerning the key elements of the business model (value creation, value configuration and value capture), and new relationships between actors that may foster business model innovation. It represents a valuable resource for practitioners willing to innovate business models, academics aiming at finding new research lines, and students keen to learn more about business models.

This conference series represents a targeted response to the growing need for research that reports and debates supply chain business models and technologies applied to the fashion industry, with the aim of increasing knowledge in the area of product lifecycle management and supply chain management in that industry.

Internationalisation has been a binding request for firms dealing with the challenges of the present-day realities. Extant international business publications have recently begun to point out the relationship between the notions of 'business model' and 'internationalisation', yet the field needs considerably more attention. The core aim of this book is to provide a comprehensive analysis of the ways in which business models and internationalisation impact one another in the process of initiating and expanding international business activities. The analysis makes it feasible to detect the core issues of the interdependences between business models and internationalisation to facilitate management decision-making and implementation of pertinent firm internationalisation incorporating the application of appropriate business models. In this book, the business model is applied to explore the specifics and aspects of firm internationalisation processes. Innovating the business model is analysed as a persuasive means for augmenting the propensities of firms to internationalise. The book enriches the comprehension of the significance of business model innovation as an enabler of firm internationalisation, in view that scours in what manners business model innovation facilitate firm internationalisation. The book chapters address a broad range of issues encompassing: the general roles of business model in firm internationalisation, the relationships between digital business models and platforms on one side and firm internationalisation on another, how business models determine the internationalisation of services firms, the interplay between business models and firm internationalisation in specific contexts. It will, therefore, be of interest to researchers, academics and advanced students in the fields of international business and management.

Extreme poverty continues to afflict the world, and it requires urgent action. Social innovation can be the driving force to spark change and to find common ground for shared value creation, particularly when it is directed at low-income markets. Leading companies have recently developed innovative forms of social innovation by combining three elements - the concept of shared value creation, the theory of the fortune at the bottom of the pyramid, and a corporate social entrepreneurship approach - which they use to enter low-income markets by helping to solve global challenges while simultaneously generating profits. The book identifies the main forms of social innovation: social business models, social products and social communication strategies. Further, it shows how companies can successfully implement social innovation and presents new forms of social business models that can be used to target low-income markets. Finally, the book presents key success factors related to the social product innovation process and corresponding communication.
