Families are all home together for more time than anyone could have ever imagined. Kids who are old enough need to step up and help around the house, as well as sit in front of their screens for both school and pleasure. So it's the perfect time to have a frank conversation, a family conference, about housework, care work, and equality.

A fresh collection of original essays by leading scholars that explores how families operate in everyday life.

All families change over time. Sometimes a baby is born, or a grown-up gets married. And sometimes a child gets a new foster parent or a new adopted mom or dad. Children need to know that when this happens, it's not their fault. They need to understand that they can remember and value their birth family and love their new family, too. Straightforward words and full-color illustrations offer hope and support for children facing or experiencing change. Includes resources and information for birth parents, foster parents, social workers, counselors, and teachers.

Stephanie Coontz, the author of The Way We Never Were, now turns her attention to the mythology that surrounds today's family—the demonizing of “untraditional” family forms and marriage and parenting issues. She argues that while it's not crazy to miss the more hopeful economic trends of the 1950s and 1960s, few would want to go back to the gender roles and race relations of those years. Mothers are going to remain in the workforce, family diversity is here to stay, and the nuclear family can no longer handle all the responsibilities of elder care and childrearing.Coontz gives a balanced account of how these changes affect families, both positively and negatively, but she rejects the notion that the new diversity is a sentence of doom. Every family has distinctive resources and special vulnerabilities, and there are ways to help each one build on its strengths and minimize its weaknesses.The book provides a meticulously researched, balanced account showing why a historically informed perspective on family life can be as much help to people in sorting through family issues as going into therapy—and much more help than listening to today's political debates.

No matter your size, shape, or pedigree--if you love each other, you are a family! Moms, dads, sisters, brothers – and even Great Aunt Sue – appear in dozens of combinations, demonstrating all kinds of nontraditional families! Silly animals are cleverly depicted in framed portraits, and offer a warm celebration of family love. From School Library Journal PreS-Gr 1–Imagine a house with many rooms, whose walls each have a different color or wallpaper, accenting a family portrait hanging there. On a rustic wooden wall hangs the first portrait—a large family of ducks posing beside a still pond. The next spread shows three pandas in pink vests, much like the pink oriental wallpaper behind them. Each portrait features a gently rhyming line: "Some children live with their grandparents.../and some live with an aunt./Some children have many pets.../and some just have a plant." All of these appealing images demonstrate different ways of being a family. "Some children live with their father./ Some children have two mothers./Some children are adopted./Some have stepsisters and—brothers." The cartoon-style critters contrast pleasantly with more realistic elements—a bamboo plant, a slender ceramic dog, a fat ceramic cat. Families of hippos, tigers, lions, ostriches, and whales join the other family groups in the final spread. The loud-and-clear message is that "if you love each other, then you are a family." And imagine the many children who will be reassured because they have found a portrait of a family they will recognize as their own. A solid choice for most libraries.—Mary Jean Smith, formerly at Southside Elementary School, Lebanon, TN

In this "refreshingly relatable" (Outside) memoir, perfect for the self-isolating family, Slate editor Dan Kois sets out with his family on a journey around the world to change their lives together. What happens when one frustrated dad turns his kids' lives upside down in search of a new way to be a family? Dan Kois and his wife always did their best for their kids. Busy professionals living in the D.C. suburbs, they scheduled their children's time wisely, and when they weren't arguing over screen time, the Kois family—Dan, his wife Alia, and their two pre-teen daughters—could each be found searching for their own happiness. But aren't families supposed to achieve happiness together? In this eye-opening, heartwarming, and very funny family memoir, the fractious, loving Kois' go in search of other places on the map that might offer them the chance to live away from home—but closer together. Over a year the family lands in New Zealand, the Netherlands, Costa Rica, and small-town Kansas. The goal? To get out of their rut of busyness and distractedness and to see how other families live outside the East Coast parenting bubble. HOW TO BE A FAMILY brings readers along as the Kois girls—witty, solitary, extremely online Lyra and goofy, sensitive, social butterfly Harper—like through the Kiwi bush, ride bikes to a Dutch school in the pouring rain, battle iguanas in their Costa Rican kitchen, and learn to love a town where everyone knows your name. Meanwhile, Dan interviews neighbors, public officials, and scholars to learn why each of these places work the way they do. Will this trip change the Kois family's lives? Or do families take their problems and conflicts with them wherever we go? A journalistic memoir filled with heart, empathy, and lots of whining, HOW TO BE A FAMILY will make readers dream about the amazing adventures their own families might take.

Some children live with their mothers and fathers. Others have stepparents or live with just one parent. Still others live with grandparents or foster parents who chose them specially. But all children all around the world, are part of families--big and small, loving, sharing, and caring for one another. This look at all kinds of families from all over the world helps young children begin to think about families they belong to, as it gives them a glimpse into the rich variety of world cultures.

The definitive edition of the classic, myth-shattering history of the American family Leave It to Beaver was not a documentary, a man's home has never been his castle, the "male breadwinner marriage" is the least traditional family in history, and rape and sexual assault were far higher in the 1970s than they are today. In The Way We Never Were, acclaimed historian Stephanie Coontz examines two centuries of the American family, sweeping away misconceptions about the past that cloud current debates about domestic life. The 1950s do not present a workable model of how to conduct our personal lives today, Coontz argues, and neither does any other era from our cultural past. This revised edition includes a new introduction and epilogue, exploring how the clash between growing gender equality and rising economic inequality is reshaping family life, marriage, and male-female relationships in our modern era. More relevant than ever, The Way We Never Were is a potent corrective to dangerous nostalgia for an American tradition that never really existed.

What has happened to marriage and families? What is the current state of families? Where are families headed? Where is family scholarship headed? As families face challenges today brought on by events that have changed their perception of the world, there is a need for a clear assessment of what has happened to families in the past and an examination of some data-based theories about what is likely to happen in the future. The Handbook of Contemporary Families explores how families have changed in the last 30 years and speculates about future trends. Editors Marilyn Coleman and Lawrence H. Ganong, along with a multidisciplinary group of contributors, critique the approaches used to study relationships and families while suggesting modern approaches for the new millennium. The Handbook looks at how changes within the contemporary family have been reflected in family law, family education, and family therapy. Features of this Handbook: Examines a diverse array of families and relationships in which people live, including chapters on alternative lifestyles, gay and lesbian relationships, economically distressed families, religion and families, racial and ethnic diversity, a feminist vision for families, older families, and the effect of computers and other technology on family relationships Includes both a historical review and future speculation on the subjects covered in each chapter Interdisciplinary contributors representing a variety of fields such as history, family studies, sociology, law, therapy, social work, psychology, nursing, and human development The Handbook of Contemporary Families is an excellent resource for advanced undergraduate and graduate students, researchers, educators, and practitioners who study and work with families in several disciplines, including Family Science, Human Development and Family Studies, Sociology, Marriage & Family Therapy, and Social Work.

Prominent cultural critic Judith Stacey offers a ringing rebuttal to the rhetoric of "family values" with this powerful argument for accepting family diversity—including a strong new case for legal same-sex marriage.

In The Secrets of Happy Families, New York Times bestselling author Bruce Feiler has drawn up a blueprint for modern families – a new approach to family dynamics, inspired by cutting-edge techniques gathered from experts in the disciplines of science, business, sports, and the military. The result is a funny and thought-provoking playbook for contemporary families, with more than 200 useful strategies, including: the right way to have family dinner, what your mother never told you about sex (but should have), and why you should always have two women present in difficult conversations... Timely, compassionate, and filled with practical tips and wise advice, Bruce Feiler's The Secrets of Happy Families: Improve Your Mornings, Rethink Family Dinner, Fight Smarter, Go Out and Play, and Much More should be required reading for all parents.
