 Aiden Markram and Quinton de Kock score half-centuries as South Africa pockets the five-match T20I series against the West Indies in Grenada.

This is an extraordinary work which covers both the author's life and the political history of the tiny island of Grenada in the Eastern Caribbean, from the 1951 uprising to the March 13, 1979 triumph of the Grenada Revolution. Starting at the age of six-and-a-half, the author witnesses a number of life-forming events, beginning with Grenada's violent revolutionary upheaval in 1951. This book brings to life the battles between Grenada's agricultural workers and very small farmers on one side, and the planter class and British colonial authorities on the other. The author describes, from personal observation as a young child, the many mass demonstrations and candle light processions of the workers while on general strike; each event unfolding in the tense atmosphere of the presence of hundreds of heavily armed British troops, and police from neighbouring islands brought in by the colonial authorities. The declared decision of the mass-uprising's leader to walk on sea water to attend a huge mass meeting on Grenada's Carenage at the height of the uprising is graphically described, as are the reactions of his supporters and detractors. This book also traces the evolution of the close personal and political friendship, begun at age 12, between Maurice Bishop (Grenada's Prime Minister 1979-'83) and the author, Bernard Coard (Grenada's Deputy Prime Minister during that same period). Their friendship deepens during their university years in the USA and Britain in the 1960s. Their experience of racism, exposure to the US civil rights struggles, the Vietnam War protests, the emergence of "Black Power," and the African decolonization struggle, help shape their ideological outlook, and the methods of political struggle that they and the other future leaders of Grenada would employ on returning to Grenada.Skyred describes the excitement, difficulties, and danger as the newly returned political leaders challenge the brutality and corruption set in motion by the very one who had led the 1951 workers' uprising. Maurice and Bernard's partnership of two decades would be a decisive element in the 1979 armed, mass-participatory overthrow of the Eric Gairy regime, and the establishment of the People's Revolutionary Government of Grenada.The day of the overthrow of the Eric Gairy government, March 13, 1979, is captured in vivid detail, as are the seeds of the political mistakes which would, less than five years later, lead to tragedy and disaster on an unprecedented scale.

This paper presents key findings of the Second Review for Grenada under the Poverty Reduction and Growth Facility (PRGF). Grenada ' s economic outlook has deteriorated somewhat, mainly reflecting the global financial turmoil and slowing global growth. Financial turmoil and the global economic slowdown are expected to slow tourism demand, FDI, and remittances, and could also negatively affect grants from some donors. The authorities are moving forward with a policy framework that provides for needed fiscal consolidation, addresses financial sector vulnerabilities, and reinvigorates the structural agenda.

EXECUTIVE SUMMARY Extended Credit Facility (ECF) Arrangement. The program was approved on June 26, 2014 and the first review completed on December 12, 2014. Grenada has received SDR 4.04 million (about US\$5.9 million) so far under the arrangement and the equivalent of SDR 2 million (about US\$3 million) will be made available upon Executive Board completion of the second review. Debt restructuring. Grenada has achieved a critical milestone in its debt restructuring, reaching agreement on key restructuring terms with its largest private creditor group. The agreement implies a net present value reduction in the related debt of 54 percent and will reduce public debt by 13 percent of 2017 GDP once fully executed. The restructuring of Grenada ' s debt with the Export-Import Bank of Taiwan Province of China at end-2014 reduced the stock of public debt by another 2 percent of GDP. The authorities expect to finalize negotiations with remaining creditors by end-2015. Program Performance. Overall program implementation remains solid. All but one quantitative performance criteria for the second review were met with wide margins. Major reforms of the fiscal policy framework to anchor debt sustainability have been completed, albeit with some delay, including new fiscal responsibility legislation and the reform of the bulk of the tax incentive regime to eliminate discretion. The strategy to reform parastatal entities has also been completed and its implementation started. Second Review. Discussions focused on meeting the 2015-16 fiscal targets and the structural reform agenda. Modifications are proposed to the 2015 performance criteria to accommodate one-time costs of structural reforms and to the ceiling on non- concessional borrowing to clarify when a loan is considered contracted. Proposed structural conditionality seeks the transparent and sustainable management of citizenship-by-investment receipts and to bring the chart of accounts in line with international best practice.

Two black Americans who visited Grenada in 1980 report on their findings.

Based on hitherto classified government documents and interviews with many of the key decision-makers, the author examines the People's Revolutionary Government of Grenada's (PRG) economic successes and failures during its four and one-half year reign. It includes discussions of how the PRG attempted to realize its intentions; the most important political and economic problems faced by the government in light of its foreign aid socialism strategy; Grenada's role in the Soviet block; how Grenada gained allies and aid; general problems of economic development, including proposed solutions and results; and the different sectors of the Grenadan economy and the macroeconomic success of the PRG.
