The twenty-three articles in this volume are based on papers and posters presented at the Olomouc Linguistics Colloquium (OLINCO) at Palacký University in the Czech Republic in June 7-9, 2018. This conference welcomed papers that combined analyses of language structure with generalizations about language use. The thematic sections are as follows: Part I. Micro-syntax: The Structure and Interpretation of Verb Phrases; Part II. Micro-syntax: Word-Internal Morphosyntax in Nominal Projections; Part III. Macro-syntax: Structure and Interpretation of Discourse Markers and Projections; Part IV: Empirical Approaches to Contrastive Linguistics and Translation Studies. Články v tomto sborníku vycházejí z

příspěvků prezentovaných na konferenci Olomouc Linguistics Colloquium (OLINCO), pořádané Univerzitou Palackého v Olomouci ve dnech 7. 6. - 9. 6. 2018. Jako téma byl zvolen "Jazyk jako prostředek a lingvistická struktura", což mělo umožnit prezentaci referátů ze všech současných lingvistických disciplín, pokud se zabývají vědeckým (empirickým, formálním) popisem jazykového systému. Články jsou rozděleny do následujících tematických sekcí: Part I. Micro-syntax: The Structure and Interpretation of Verb Phrases; Part II. Micro-syntax: Word-Internal Morphosyntax in Nominal Projections; Part III. Macro-syntax: Structure and Interpretation of Discourse Markers and Projections; Part IV: Empirical

Approaches to Contrastive Linguistics and Translation Studies.

This book is a cross-linguistic study of the syntax of yes-no questions and their answers, drawing on data from a wide range of languages with particular focus on English, Finnish, Swedish, Thai, and Chinese. There are broadly two types of answer to yes-no questions: those that employ particles such as 'yes' and 'no' (as found in English) and those that echo a part of the question, usually the finite verb, with or without negation (as found in Finnish). The latter are uncontroversially derived by ellipsis, while the former have been claimed to be clause substitutes. Anders

Holmberg argues instead that even answers that employ particles are complete sentences, derived by ellipsis from full sentential expressions, and that the two types share essential syntactic properties. The book also examines the related cross-linguistic and intralinguistic variation observed in answers to negative questions such as 'does he not drink coffee?', whereby 'yes' in one language appears to correspond to 'no' in another. The book illustrates how a seemingly trivial phenomenon can have the most wide-ranging consequences for theories of language, and will be of interest not only to theoretical linguists but also to students and scholars of typological and descriptive linguistics.

Offers an explanation for a long-standing question in the typological distinction among languages with respect to formation of interrogatives which use questions words such as "who" and "what." Proposes that the availability of question particles and the properties of question words contribute to the typological distinctions found, and argues that the availability of question particles correlates with the lack of fronting of question words. Of interest to scholars working on interrogatives, syntactic theory, comparative syntax, Chinese syntax, and typology. Annotation copyrighted by Book News, Inc., Portland, OR

This book explores the interaction of the grammar with the external systems, conceptual-intentional and sensori-motor. The papers in the Language section include configurational analyses of the interface properties of depictives, clitic clusters, imperatives, conditionals, clefts, as well as asymmetries in the structure of syllables and feet. The Brain section discusses questions related to human learning and comprehension of language: the acquisition of compounds, the acquisition of the definite article, the subject/object asymmetry in the comprehension of D-Linked vs. non D-linked questions, the evidence for syntactic asymmetries in American Sign Language,

the acquisition of syllable types, and the role of stress shift in the determination of phrase ending. The papers in the Computation section present different perspectives on how the properties of UG can be implemented in a parser; implementations of different theories including configurational selection, incorporation, and minimalism; and the role of statistical and quantitative approaches in natural language processing.

This text presents evidence locating adverb phrases in the specifiers of distinct functional projections within a theory of the clause. In this theory, both adverbs and heads, which encode the functional

notions of the clause, are ordered in a rigid sequence. The author's proposal suggests that the structure of natural language sentences is much richer than previously assumed.

This volume contains selected papers from the 1st Forle Conference on Interpreting Studies. The papers seek to take stock of the situation, at the turn of the 21st century, in research, training and the profession.

Asymmetry in Grammar: Morphology, Phonology and Acquisition presents evidence that asymmetry, as a property of linguistic relations, is salient in grammar. The papers in morphology bring further evidence for

Download Free La Privacy A Scuola Isuto Comprensivo Statale Vicenza 10

the centrality of asymmetry in word-structure. It is shown that asymmetry is part of the internal structure of functional constructs such as determiners and complementizers, as it is the case for lexical constructs. Further evidence is presented for the asymmetry of prefixes in verb structure. A typology of formal objects based on the distinction between maximal and minimal categories is formulated. It is proposed that Formal Complexity drives the change from synthetic to analytic expressions. The papers in phonology point to the fact that asymmetry is part of that linguistic dimension in terms of processes that eliminates symmetric relations, in terms of head-dependency relations, in terms of relative scope of

the distinctive features in any inventory, in terms of universal principles in combination with certain language specific choices. Moreover, the papers on acquisition bring to fore experimental data that point to the same direction. The asymmetry of grammatical relations provides the form of the initial state of language that enables the child to cope with the poverty of the stimulus. The collection includes papers in morphology by Anna Maria Di Sciullo, Angela Ralli, Réjean Canac-Marquis, Abdelkader Fassi Fehri, papers in phonology by Eric Raimy, Harry van der Hulst and Nancy Ritter, Glyne Piggott, Charles Reiss, Elan Dresher, and papers in acquisition from Maria Louisa Rivero and Magdalena Goledzinowska,

and David Lebeaux.

The grammar of focus has been studied in generative grammar from its inception. It has been the subject of intense, detailed cross-linguistic investigation for over 20 years, particularly within the Principles and Parameters framework. It is appropriate at this point, therefore, to take stock. Appraisal at this particular point is all the more legitimate because it comes at a time of general evaluation of the results of the profound activity that has characterized the Principles and Parameters framework. This general assessment has produced a radical new direction within that framework. The volume starts off with an introductory

chapter that aims to provide an outline for the assessment, to be followed by an overview of the evolution of the study of focus in generative grammar, and a recapitulation of the principal issues associated with focus. These issues are taken up in the remaining chapters of the book, where various grammatical means of marking focus (as well as grammaticalization of focus marking) are analyzed in a wide variety of languages.

The notion of focus structure in this work refers to the distinction between categorical,thetic and identificational sentences. The central claim is that the syntactic representation of every sentence has to

Download Free La Privacy A Scuola Isuto Comprensivo Statale Vicenza 10

encode which of these types of focus structure is realized. This claim is discussed in great detail with respect to syntax, intonation and semantics within the framework of the Minimalist Program. It is shown that the incorporation of focus structure into syntax offers new perspectives for a solution of vexing problems in syntax and semantics. For example, fronting (preposing, 'topicalisation') is treated as a syntactic operation which clearly belongs to core grammar, i.e. is not optional or 'stylistic'; the semantic notion of quantifier raising is dispensed with in favour of a focus structural treatment of phenomena which gave rise to it. The book appeals to generative linguists and to functional linguists who do not believe in an

unbridgeable gap between the formal and functional analysis of language.

Contains seventeen papers on microvariation in syntactic doubling. This work provides an overview of the syntactic doubling phenomena attested and of the theoretical analyses available. It discusses the syntactic doubling phenomena including, among others, subject pronoun doubling, WH pronoun doubling, clitic doubling and auxiliary doubling.
