Formal syntax auto | fixed Examples Fixed-width tables with text-overflow. This example uses a fixed table layout, combined with the width property, to restrict the table's width. The text-overflow property is used to apply an ellipsis to words that are too long to fit. If the table layout were auto, the table would grow to accomodate its contents, despite the specified width.

You need only outline the changes. The word cascade in Cascading Style Sheets means your styles are passed along (inherited) by style sheets that get their instructions from your original preferences - in this case, those you set up in the class. Basically, when you set up a style, any element that gets assigned that style "cascades through" to the other styles, as directed by your settings, unless you apply a change.
