the requirements and steps for creating a sample Mule application.

Creating a Mule ESB Sample Application - DZone Integration

Mule ESB is a lightweight Java-based Enterprise Service Bus. It allows developers to connect multiple applications together by exchanging data in different formats. It carries data in the form of a message. ESBs offer powerful capabilities by providing a number of services, such as:

Getting Started With Mule ESB | Baeldung
Mule Expression Language (MEL) Example:
#[message.outboundProperties] Outbound Properties: These are mutable and can be set by Mule or a user can alter them by using transformer elements in the flow.
