No member of the emergency room or trauma ward physician should be without this 4th edition of The Trauma Manual: Trauma and Acute Care Surgery. Designed to be used as a quick reference, this multidisciplinary pocket guide addresses all areas of trauma and emergency surgery with a list of key points at the end of each chapter. In addition to a new section on the intensive care unit and an extended section on surgical emergencies, this manual also covers GI hemorrhage, hernias, bowel obstruction, pancreatitis, biliary tract disease, and other surgical challenges faced by trauma and emergency surgery personnel. Organized in a chronological fashion following the usual events and phases of care after injury or acute surgical illness, this user-friendly manual is one guide every trauma surgeon, surgical resident, surgical critical care specialist, emergency medicine physician, and emergency or trauma nurse, will want to keep close by. NEW TO THIS EDITION * Additional section on the intensive care unit * Extended section on surgical emergencies * 5 new chapters covering: - Acute respiratory failure - Cardiovascular disease and monitoring - Multiple organ dysfunction - Soft tissue infections - The role of laparoscopy in emergency surgery

An ideal companion from the authors' of Trauma, 4/e, this concise pocket manual is a quick reference to the most common diseases and disorders encountered by the trauma surgeon. Through the use of diagnostic and treatment algorithms, the companion gives the surgeon fast access to the appropriate surgical procedure.

Unless dealing with injury regularly, few surgeons can attain and sustain the level of skill necessary for decision making in major trauma. This includes both the intellectual decisions and the manual dexterity required to perform all the manoeuvres needed for surgical access and control. These can be particularly challenging, and may be infrequently required, yet rapid access to and control of sites of haemorrhage following trauma can be life-saving surgical intervention. Many situations require specialist trauma expertise, yet often this is simply not on hand within the available time frame. Manual of Definitive Surgical Trauma Care, Second Edition, is written by the editorial board of the DSTCTM, which is a short course focusing on the life-saving surgical techniques and surgical decision-making required for surgeons who deal with major surgical trauma on an infrequent basis. This course supplements the well-recognized and accepted American College of Surgeons' Advanced Trauma Life Support (ATLS®) course. This manual is published in association with IATSID (the International Association for the Surgery of Trauma and Surgical Intensive Care), and is written by an Editorial Board of surgeons who belong to that society. IATSID are broadening their reach and running more and more courses worldwide. This new second edition has been updated to incorporate all recent developments in this rapidly progressing area. It emphasizes how practical 'real-life' decisions on the care of the injured patient should be made and then covers in practical terms the surgical techniques required. Every aspect of surgical trauma care is covered, including: -the causation of injuries - aids rapid understanding of presented trauma; -the initial, pre-hospital and emergency department care of the patient - all of which may determine eventual outcome; -the resources required, both physical and intellectual, within the hospital to deal with the specific problems associated with patients with multiple injuries; the limitations in providing specialist expertise within the time frame required. It is an ideal practical manual for both trainees and qualified surgeons.

Covering all areas of trauma, critical care, and emergency surgery, The Trauma Manual: Trauma and Acute Care Surgery, 5th Edition, brings you fully up to date with recent changes in the field. This pocket manual is an indispensable resource for everyone on the trauma/acute care team, with practical, easy-to-read coverage of the wide range of patients seen daily with urgent presentation i whether from injury, emergency general surgical disease, or a major complication. This user-friendly manual is one that every trauma surgeon, surgical resident, surgical critical care specialist, emergency medicine physician, and emergency or trauma nurse will want to keep close at hand for daily use.

Thoroughly revised and featuring a more efficient and streamlined design, the new 7th edition of Sheehy's trusted emergency care resource offers complete, up-to-date coverage of the essentials emergency nurses need to know. Each condition commonly seen in the emergency setting is thoroughly addressed, from signs and symptoms, to diagnosis, treatment, developmental considerations, patient education, and more. Updated material and easy-to-reference contents make this resource a must-have for current practice. Comprehensive content presents thorough discussion of signs and symptoms, diagnosis, treatment, age/developmental considerations, and patient/family education for each condition. Authorship from the Emergency Nurses Association ensures this book contains the best practices in emergency nursing. Quick-reference format uses a consistent layout to help you find information quickly and easily. NEW! 2-column format features new Tricks of the Trade boxes to give you a professional's perspective on common issues in emergency nursing. NEW! Fully revised content from the ENA and a broad panel of expert contributors includes up-to-date, practical information on topics such as critical care in the ED, time management, the morbidly obese patient, electronic medical records, disaster nursing, forensic nursing, and workplace violence.

No member of the emergency room or trauma ward physician should be without this 4th edition of The Trauma Manual: Trauma and Acute Care Surgery. Designed to be used as a quick reference, this multidisciplinary pocket guide addresses all areas of trauma and emergency surgery with a list of key points at the end of each chapter. In addition to a new section on the intensive care unit and an extended section on surgical emergencies, this manual also covers GI hemorrhage, hernias, bowel obstruction, pancreatitis, biliary tract disease, and other surgical challenges faced by trauma and emergency surgery personnel. Organized in a chronological fashion following the usual events and phases of care after injury or acute surgical illness, this user-friendly manual is one guide every trauma surgeon, surgical resident, surgical critical care specialist, emergency medicine physician, and emergency or trauma nurse, will want to keep close by.

Neurocritical Care Board Review: Questions and Answers provides clinicians with a thorough review of the complex subspecialty of Neurocritical Care, using a question-and-answer (Q&A) format. The Q&A format is easily readable, high yield, and serves as good practice for test takers or anyone looking to improve or reinforce essential knowledge. The book covers the key topics pertinent to (and found on) neurocritical care boards, and is organized according to the exam core curriculum outline.. A total of 649 questions address both neuroscience critical care (general neurology, neurotrauma, neurovascular and neurosurgical problems) and general critical care topics (systems trauma, cardiovascular, infectious disease, pulmonary and renal issues, and hemodynamic monitoring). Detailed explanations follow in the answer section of each chapter, along with references for further study). Where relevant, neuroimaging, EEG and monitoring waveforms, and other images are included in case questions to allow candidates to familiarize themselves with these tools that form a significant part of the exam. Features of Neurocritical Care Board Review include: Comprehensive, high-yield review that covers all areas tested on the neurocritical care certifying exam Applicability to a wide range of physicians in multiple specialties reviewing for boards or looking to test skills and clinical acumen in this challenging area Question and answer format with detailed explanations and references to facilitate recall of must-know information and help identify knowledge gaps for further attention Material aggregated from multiple specialties into a singular resource for exam study

Textbook and Color Atlas of Traumatic Injuries to the Teeth, Fifth Edition encompasses the full scope of acute dental trauma, including all aspects of interdisciplinary treatment. This new edition embraces the significant advances made in the subject of dental traumatology since the publication of the previous edition in 2007. Thoroughly updated throughout, it includes eight new chapters, including one chapter focused on the development of bioengineered teeth and another on clinical regenerative endodontics. Providing the theoretical background behind the clinical applications, the text is supplemented by a step-by-step online guide to procedures at www.dentaltraumaguide.org. The book is also filled with full-color illustrations throughout,making it the ultimate guide for anyone treating individuals afflicted with dental injuries caused by traffic accidents, sporting injuries, violent assaults, and other falls, crashes, or injuries. New edition of the definitive reference on dental traumatology Thoroughly revised and updated with a modern look and feel Eight new chapters on innovative developments in the field Contributions from world-renowned authors and editors Linked to www.dentaltraumaguide.org with a specific chapter on how the book complements the online guide This comprehensive textbook is an invaluable reference for undergraduate BDS courses worldwide, as well as a core text for postgraduate pediatric, oral surgery, and endodontics courses.

The thoroughly updated Second Edition of this popular and widely used pocket reference guides the trauma team through every aspect of patient care after injury—from prehospital care, to resuscitation, treatment of specific organ injuries, priorities in intensive care, and management of special situations. Designed for rapid, on-the-spot information retrieval, The Trauma Manual, Second Edition will be a staple reference in emergency departments. Flow charts, algorithms, sequential lists, and tables throughout facilitate quick clinical decision-making. More than 100 illustrations demonstrate specific injuries and procedures. Appendices include injury scales, tetanus prophylaxis recommendations, commonly used formulae and values, and frequently used forms. This edition includes a new chapter on commonly missed injuries and common pitfalls.

Trauma is a serious public health problem worldwide and is the leading cause of death among adults and children. Physiotherapists play a key role in the interdisciplinary team caring for patients with physical injury after a traumatic event. Cardiopulmonary Physiotherapy in Trauma offers valuable insight into the advanced trauma life support and acute care management of patients with trauma-related injuries, as well as physiotherapy treatment aims, intervention strategies and precautions to treatment. A variety of topics related to trauma are brought together in this practical volume, which shares information obtained from published research as well as the extensive clinical expertise of the authors. The dissemination of the authors' personal experience is key in cases where evidence to support the use of certain treatment techniques in patients with traumatic injury is still lacking. The book is thus an essential reference that encourages evidence-based practice for advanced undergraduate students, as well as graduate physiotherapists who work with trauma patients in the acute care setting. Contents: Physiological Response to Trauma (H van Aswegen)Not Just 'Small Adults': Paediatric Anatomy and Physiology in Relation to Trauma (B M Morrow)Trauma and Immunosuppressive Diseases (H van Aswegen and B M Morrow)Physiotherapy Modalities, Markers and Outcome Measures (B M Morrow and H van Aswegen)Blunt and Penetrating Injuries (H van Aswegen, B M Morrow and E van Aswegen)Burn Injuries (S Hånekom, M Wilson, B M Morrow and H van Aswegen)Multiple Orthopaedic Injuries (N Piani, H van Aswegen and B M Morrow)Spinal Cord Injury (W Mudzi, H van Aswegen and B M Morrow)Traumatic Brain Injury (R Roos, B M Morrow and H van Aswegen)Quality of Life of Survivors of Trauma (H van Aswegen) Readership: Physiotherapists who work in the acute care setting and manage adult and paediatric patients with traumatic injuries; Physiotherapy students studying towards Master of Science qualification (the topic is covered in the final two years of u/g cardiopulmonary physiotherapy courses); Researchers with an interest in rehabilitation of patients with traumatic injury in the acute care setting or after discharge from acute care setting. Undergraduate physiotherapy students for subjects related to cardiopulmonary physiotherapy treatment techniques, physiotherapy in critical care, traumatology and orthopaedics, graduate nurses, doctors and allied health practitioners may gain a better understanding of the role of a physiotherapist, as a member of the interdisciplinary team in the acute care setting, in the management of patients with traumatic injuries. Key Features:Written by expert physiotherapists for physiotherapistsProvides more detailed information on the advanced trauma life support, surgical and intensive care unit management of patients with various types of traumatic injury compared with information found in other cardiopulmonary physiotherapy textbooksProvides evidence-based information on the physiotherapy management of both adult and paediatric patients with traumatic injury in the acute care settingExtensive pedagogical features make this text easily digestible and accessible for undergraduates and new practitioners on the go i.e., 'key message' boxes and clinical case scenariosExercise therapy strategies for the rehabilitation of patients with traumatic injury in the acute care setting and after hospital discharge are also providedThe only truly comprehensive & pedagogical textbook on the topicInternational market! should be the book recommended in the UK and abroad (editors are based in South Africa)Keywords:Trauma;Cardiopulmonary;Physiotherapy;Injury;Rehabilitation
